phoric acid and granulation unit, in collaboration with Industrial Development Corporation of South Africa—a

railed to Mozambique where phosphoric acid production and granulation would take place. An RCF team had recently been to Mozambique to work out further details.

## State-run company's initiative is in step with the Centre's policy to explore JV options abroad

Sources told FE, "The final decision will be taken with the active involvement of the entire and the South African government. If required, the RCF team will visit Mozambique again." The RCF's initiative has been on the lines of the centre's policy to explore JV options abroad, sources further added.

Sulphur will be imported

from Canada and the Middle East and ammonia from the Middle East to process the rock. Most of the finished phosphatic fertiliser would then be shipped to India.

However, sources admitted that gas allocation for such a project is a problem and exploratory drilling for additional gas is till at an ear-

## Women corner 76% of NREGA work

Economy Bureau  
Kochi, Feb 22

Dominance of women folk in the NREGA works of the state continues for the second year, even as the programme is extended to four districts.

With women taking to the state-sponsored scheme in a big way, small estates and land holdings are finding it difficult to employ women during the picking and harvest time. It is estimated that women cornered 76% of the jobs created
